## Experience

### Head of Product, Presence (VC-backed startup)

San Francisco, USA, 2022-2025

- Led product design and engineering for a 20-person team; achieved product-market fit and scaled to millions in ARR, securing \$10M+ in funding
- Led development for cross-platform applications spanning Web, mobile, and interactive platforms, leveraging modern frameworks, backend systems, and computer vision technologies
- Executed AI-driven media campaigns, boosting ROI from 89.8% to 217.4%

### Software Engineer II, Airbnb

Remote, 2020-2022

- Built customer agent tools and chatbot features, including reply templates that improved ticket resolution time
- Rebuilt support classification with a BERT-based model, enabling the chatbot to resolve more issues
- Automated customer support notifications, reducing related human support calls by 2%
- Maintained airbnb/visx (>20k stars on Github) adding support for React 18/19
- 2021 Hackathon Winner: developed a 3D Earth visualization showing travel history on Airbnb

### Software Engineer, Tableau Software

Seattle, USA and Vancouver, Canada, 2017-2020

- Built Tableau Public, enabling millions of users to analyze and publish data visualizations online; feature lead for hashtags, search autocomplete, image/thumbnail generation with server-less architecture
- Refactored Tableau Online to TypeScript, React, Redux and set up CI/CD pipelines, accelerating feature delivery and improving developer experience
- Delivered talks at Tableau Conference 2017, React Conference 2019, and AWS Re:Invent 2019

## Education

### Stanford University, California, USA

December 2024 – April 2026

*M.S. in Learning, Design, Technology*

### McGill University, Québec, Canada

September 2013 – April 2018

*B.A. Major in Computer Science, Minor in Music Theory*

## Skills

|                  |                                                                                                                                       |
|------------------|---------------------------------------------------------------------------------------------------------------------------------------|
| Languages        | Java/Kotlin, JavaScript (TypeScript), C#, Swift, Python, SQL, C, Ruby                                                                 |
| Tools/Frameworks | Unity, iOS, React, Redux, D3, Git, Unity, Flask, Tableau, AWS, Docker, Kubernetes, Terraform, GraphQL, Kafka, ARKit/ARCore, Mediapipe |
| Others           | User Growth, Media Marketing, CI/CD, Algorithms, UX/UI Design, Serverless, Music Theory, Jazz Guitar                                  |

## Projects\*

### OOTD.ai

- AI agent that scores your daily outfits and gives personalized style advice
- Project at [App Store](#)

### Patternize.io

- An e-book that explains data structure and algorithms using user-friendly D3 visualizations, ~500 stars on Github
- Project at [patternize.github.io](https://patternize.github.io)
